## JOKISCH MIGMA TANO DPR MK

Designed for severe to severest machining for a variety of materials.

Free of secondary amines - free of formaldehyde  
Properties: stable in hard water, pressure stable

### APPLICATION

Universally applicable water soluble cooling lubricant, excellent suited for severe to severest processing. Of particular note here is the problem-free machining of aluminum and the demanding machining of high-alloy steels and titanium.

### CHARACTERISTICS

Formulated with low aromatic, highly refined base oils. Special emulsifiers ensure an excellent performance spectrum and high corrosion protection even at low concentrations. Particularly selected AW additives allow machining with high cutting speeds. Long term stability against bacteria, also suited for internally cooled tools and high pump pressures.

### PROPOSED CONCENTRATION

Light machining	1:20
Severe machining	1:15
Severest machining	1:10
